

COMPENG 2SH4 Project – Statement of Contribution

Your Group Name Aashish + Garish

Your Name Aashish Samuel Paul

Your Team Member's Name Garish Manivannan

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

I worked on:

- Iteration 2
- Iteration 3 (some of the snake movement)
- Bonus (adding special characters, score and length changes)
- Debugging
- Commenting the code

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

My partner worked on:

- Iteration 1
- Iteration 3
- Bonus (5 random characters generation condition)
- Debugging

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

My partner and I worked well together throughout the course of the project. We told each other what responsibilities we would undertake and informed the other of our progress. Handling the debugging of the code together helped deepen our understanding of how the code works and of the general nature of Object-Oriented Programming. In my opinion, this first collaborative software effort with my partner was an overall positive experience.
